

DOJ Dossier Memo - James Comey hid crimes of paedophile law firms defrauding client millions

Highlights:

Dismissal of FBI Director James Comey escalates concern at large paedophile law firms defrauding millions in client funds, whom Comey was protecting, in donor blackmail schemes tying into Hillary Clinton family and also Bush family 'foundations'; threats to FBI agents, DOJ staff, US lawyers if they challenge crimes indulged by Comey

Media campaign against President Trump over Comey firing, heavily led by media who earned paedophile bribery cash, now fearing criminal indictment under new US Attorney General Jefferson Beauregard Sessions III ... US Dept of Justice files show paedophile and terrorism cash buying 'Fake News' at New York Times, UK Guardian; pro-Comey, anti-Trump attacks from rogue US intel tied to Edward Snowden hoaxes

FBI Comey role re bribing 2 federal judges; channelling funds from foreign child rape and terrorist groups; 'pay us or we kill you' extortion; selling 'comfort letters' to paedophiles; false evidence and perjury in USA federal courts; fraudulent documents claiming that witness journalist 'agreed' to lifelong ban of his own freedom of speech and press; Comey indulging racist hate of 'n-ggers' and dissident 'kike Jew f-ckers'; paedophile, bribery and terrorist acts violating laws in at least six countries

Paedophile-supporting top lawyer of Google, David Drummond, aiding paedophile criminals at Ropes Gray and WilmerHale law firms, in scheme centred in office of Joan Ann Lukey in Boston ... Paedophile teams dominated Wikipedia / Google, helping paedophiles and terrorists in marketing and defaming witnesses to their crimes

Comey's allies at Google mask his misconduct

It is significantly due to James Comey's own malfeasance in office, that Comey's involvement in major international criminal acts is not better known, given that Comey's paedophile network whom he supported, included above all, the key internet control figure of David Drummond of Google Inc / Alphabet, making bribery payments to US federal judge Norman Moon, who issued 'court orders to Google' to hide from Google search the crimes of the whole paedophile group, including crimes of Google and Judge Moon themselves.

Blackmail of political donors at law firms where Comey can cash his earned bribes

It is long understood amongst the oligarchy of US politics, that major political donors reap some 'tickets' to avoid prosecution, and that US law firms and judges assist in punching those tickets. However, much to the horror of higher-integrity FBI agents, Comey indulged a radical extension of 'political donors' privilege' by some corrupt large 'high-powered' law firms, such as Ropes Gray and WilmerHale, which involved blackmailing those political donors themselves after lawyers advised and recommended and pushed clients into committing major criminal acts, including terrorism, paedophile-related extortion, and more. After the political donor to Clinton or Bush joins in the criminal acts advised by the lawyers, the donor is in a life-long blackmail trap where they must forever pay legal fees, Clinton donations, etc., to avoid prosecution.

The success of these blackmail-trap crimes by US law firms, was based on two supports, both indulged by Comey - (1) The fact that the in-effect blackmailed political donor, was also advised to escalate 'donations' of millions to Clinton or Bush and their 'foundations', making

the Clinton - Bush - Obama governments likely to grant non-prosecution favours; and (2) The fact that the paedophile law firms also bribed USA federal judges as part of the crime process, enabling the law firms to trade on the traditional US Dept of Justice reluctance to expose that US judges are being bribed.

In the eyes of some at FBI and DOJ, over-whelmed by the politically-dominant Comey and others, this whole law-firm game of tricking and inducing major felonies by political donors, then extorting millions of legal fees from those donors for years, marketed as 'protection' of these wealthy felons, with a pyramid of profits on a base of ongoing US federal judge bribery, was too much. In the eyes of more honest FBI and DOJ staff, this is out of control, becoming a major assault on the Constitution of the United States, and causing increasing harm to the leverage of the US legal system as the Comey-protected crimes become increasingly known to world governments and corporations.

There has been significant fear at the paedophile law firms of Ropes Gray and WilmerHale since President Trump's victory, fear that increased with the appointment of Jeff Sessions as Attorney General, an AG who seems to dislike paedophiles and who does not seem to be quite so ready to indulge law firms defrauding political donors out of millions of funds after inducing them into committing terrorist and other felonies. This fear is now moving toward panic levels with the firing of the paedophile law firms' good friend at the FBI, James Comey, with AG Jeff Sessions' concurring recommendation.

Bribery of key media has been a key role in these law firm crimes, as well as they key deception and hoaxing role of the paedophile-immersed chief lawyer of Google, David Drummond, who gives free web hosting to millionaire paedophiles who wish to use fake names, Drummond then placing these pro-paedophile sites at #1 in search results, whilst illegally censoring victims from replying, and also promoting and protecting Drummond's paedophile partners amongst Wikipedia administrators. This has led to Drummond and Google becoming known as paedophile violators of the European Convention on Human Rights and the United Nations charter.

Major key media involving in being bribed by paedophile law firms and their partners, are the same media involved in leading attacks on US President Donald Trump - the New York Times, the UK Guardian, and CNN, CNN's book-publishing division marketing novels of a paedophile author, supported by CNN-created Fake News video newscasts.

In his final letter to FBI staff Comey boasts "I will be fine", hinting how he can cash in at firms whose ugly paedophile crimes he indulged - perhaps at Ropes Gray or WilmerHale.

Court filing on crimes Comey indulged

A significant court filing was made in Westminster Magistrates Court UK in 2016, detailing some of the paedophile crimes in the US which James Comey was indulging, crimes which including funding for the bribery of two US federal judges by Britain's Pearson plc media company, supplying bribery, extortion and terrorism funding to Ropes Gray, WilmerHale and various other US parties.

Matters discussed in that court document, include the bribery of the paedophile media now involved in the anti-Trump, pro-Comey media blasts, the role of the paedophile-supporting chief lawyer of Google, David Drummond, and much other background. Links to that court filing are below.

Danger and threats to US public officials, even AG Jeff Sessions himself

As is clear in the DOJ files on the paedophile crimes Comey was indulging, there is a history of escalation in the crimes, a willingness by WilmerHale, Ropes Gray and others, to commit even more brutal terrorist acts to cover up for their earlier crimes. Instead of backing off or apologising to victims, their paedophile terrorist group has the instinct to double down and escalate, warning they will 'F-ck you up, slander you, kill you.'

Joan Ann Lukey of Ropes Gray Boston, took great pleasure in making a laughing menace of murder of Boston federal prosecutor Carmen Ortiz, recalling how two other female prosecutors who investigated crimes of Bush-Clinton political donors had wound up dead. 'Same thing's gonna happen to you, motherf-cker!'

James Comey knew well that he had enough evidence to imprison Joan Ann Lukey for the rest of her life for the multiple terrorist felonies and defrauding of client funds she has been running out of Boston law offices, but chose to indulge her and the menace to murder a US Attorney, along with her planting tens of thousands of words of lies on the internet, bribing the Boston Globe and New York Times staff, etc.

There is clearly a willingness to kill on the part of this crime group, and more honest and courageous groups within the FBI and DOJ would like to shut them down, But before they go down, this group would not hesitate to murder FBI agents or murder Attorney General Sessions himself with funds supplied by the UK's Pearson, if they felt able to succeed at it.

Ropes Gray and WilmerHale have a sales pitch to Attorney General Sessions, trading on the old stand-bys: 'Isn't it better to just hide how law firms like us bribe federal judges in the United States? Isn't it better if that does not become well-known? After all, we pushed the people we defrauded into paying millions to the Clintons and the Bushes. Wouldn't you like a share of the bribes we are paying, too, Mr Sessions?'

From DOJ Files - Quotes from the Comey-protected paedophile and terrorist crew
'It's all really simple. You pay millions to bribe US Presidents, and you get to bribe the federal judges ... There is no f-cking 'US Constitution' ... The 'Constitution' belongs to people like me, who own the f-cking judges!'

'Everything we do is 'legal' because we're bribing American judges, that makes anything f-cking legal ... Bribed American judges, motherf-cker, that's the game we play. What game are you playing, motherf-cker? ... Bribed American judges and Google, What the f-ck are you going to do about it?'

'So you have evidence, motherf-cker? We'll have some of the judges I'm bribing take a look at your evidence and f-cking bury it, and that'll take care of your evidence, motherf-cker!'

'Any lawyer tries to f-ck with my sh-t in America, I'll have my judges fix his f-ckin' ass, He'll hear me say, that's the last day you practice law, motherf-cker!'

'Every dumbf-ck in the world believes Wikipedia! ... I love planting sh-t on Wikipedia and watching the whole world lick up my sh-t ... copied 100,000 times all over the internet!'

'Keep your mouth shut you stupid f-cker, can have you totally destroyed on Google! ... The best part of banning someone is totally slandering the motherf-cker ... I love being able to tell people I hate, You are totally slandered, motherf-cker, and there is f-cking nothing you can do about it!'

Bribery of Harvard University, intimidation of Harvard Law School professors

There are large Department of Justice files enabling Attorney General Jeff Sessions to bring a string of felony indictments later this year, in the major Pearson paedophile scheme with the Ropes Gray and WilmerHale law firms, which involve threatening to kill a Harvard graduate who is an award-winning former US Department of Justice employee, a formerly nationally-known anti-corruption book author, and a major witness regarding these crimes to DOJ and to European governments and EU Commission. Some FBI agents, suppressed by Comey, greatly respect this Harvard graduate, who risked his own life to defend the US Constitution against the Comey-indulged paedophile group.

The Ropes Gray and WilmerHale law firms have joined in threatening to murder this Harvard graduate, stalking him with harassing e-mails and computer viruses and tens of thousands of words of defamation, and making criminal arrangements with their paedophile partner at Google to block his self-defence against lies and hoaxes.

But a major concern of Ropes Gray and WilmerHale, has been the possibility that a group of Harvard Law School professors organise to defend this Harvard alumni, given the professors could also earn some millions in fees for representing the victim of terrorist crimes by these law firms and their paedophile group. At Boston law offices, these lawyers discuss that a single Harvard law professor could be undermined and murdered as necessary, but that a group of Harvard law faculty might overwhelm matters and spur DOJ indictments, prison terms and other serious consequences for Ropes Gray and WilmerHale.

The Pearson paedophile scheme with Ropes Gray and WilmerHale, has been significantly supported by two Harvard faculty, one a lover of a paedophile in these law firms' blackmail trap, the other the notorious Cass Sunstein closely associated with Hillary Clinton, Cass Sunstein publishing propaganda for paedophile Wikipedia criminals and US paedophile intel agents, and apparently using his role at the Obama White House to benefit the paedophile group. Ironically, Sunstein knows his victim very personally, as they lived in Currier House Harvard at the same time as Harvard undergraduates.

By way of large-scale bribery, million-dollar paedophile-tied donations were made to Harvard University, as an attempt to turn Harvard administrators into agents of the paedophile scheme threatening to murder Harvard Law professors if any of them would speak out to defend the human rights of one of the bravest of Harvard alumni.

The Comey gang attack on President Trump and the Edward Snowden hoaxers

Although the general public is not aware, every major government knows what Russia's President Putin hints about his guest, that 'Edward Snowden' is in fact a massive hoax run by USA intel agency rogue schemers, Snowden never having 'stolen' any documents, but in fact being an agent of blackmail and deception of the world.

The files and intel agency reports proving this beyond any shadow of a doubt, are well-masked by Google and major media. The files tell how, laughably, Snowden first 'leaked' to Dick Cheney's friend and biographer at the Washington Post; how Snowden avoids the paedophile evidence regarding the same US judge group who would 'put Snowden on trial', etc. Excerpts from the European intel agency files on the Snowden fraud can be found here: <http://www.veteranstoday.com/2016/09/21/russia-govt-report-snowden-greenwald-are-cia-frauds/>

Very absurdly, this proven liar and hoaxer Edward Snowden, who at times openly promotes paedophile media (who sold the Snowden story) and other paedophile organisations, has now

tweeted propaganda in favour of paedophile-enabler James Comey, in a direct assault to undermine the Trump presidency.

What makes this astonishing is the fact that Snowden himself is a CIA asset, and thus CIA director Mike Pompeo should be ensuring that Snowden is not undermining President Trump whilst he is doing all his other hoax activities. If the US administration is not willing to openly admit that Snowden was a CIA fraud all along, the Snowden hoax should be wound down quickly in one of the ways clearly available.

Significant for the background, is the report at European police agencies and governments, on the operations of paedophiles amongst the highest levels of Wikipedia administrators, and involved with the crimes protected by James Comey. This report was originally written for the police of Finland but has since become standard gov't reference regarding crimes conducted through Wikipedia, operated by paedophile personalities tied to rogue lawless elements in intel agencies. The report discusses the '20 Major Techniques of Wikipedia deception' used by paedophiles and much else.

This material has become very significant to governments around the world, being part of the EU actions against Google Inc / Alphabet, actions by China and Turkey re Google and Wikipedia, etc
