An abstract geometric design featuring three blue circles of varying sizes. A large circle is in the top right, a medium circle is in the center, and a very large circle is in the bottom right. Two thin blue lines intersect: one runs diagonally from the top left towards the center, and the other runs diagonally from the top right towards the bottom right. The text is positioned on the left side of the page.

# **Catalog of Unique, Concealed & Disguised Weapons, Concealments, Escape Techniques, Tactics & Tradecraft**

Michael Chesbro

## **Officer Safety and Awareness**

# **Catalog of:**

**Unique, Concealed & Disguised Weapons,  
Concealments, Escape Techniques,  
Tactics & Tradecraft**

**6 August 2012**

## **Introduction, Acknowledgement & Disclaimer**

Everyday law enforcement, security, and intelligence personnel are faced with potential threats from unique, concealed and disguised weapons. Contraband is hidden in concealment devices; escape techniques allow criminals to run free, and tactics and tradecraft are employed which make our jobs more difficult and our lives more dangerous. By being aware of what's out there it becomes easier to recognize a threat and take action to protect ourselves against it. Likewise, in undercover, unconventional, and special operations it may be possible to adopt certain items, resources, and techniques to give us the advantage over an adversary.

I have included a reference to the source of each item listed in this catalog. Whenever possible I have linked to a major retailer (i.e. Amazon.Com) or to the web-site of the company producing the item listed. Any item that can be easily found or purchased on-line should be considered commonplace and is something that may very likely be encountered in the field.

I would like to acknowledge the work of Wendy Kierstead, CCA, of the Brunswick, Maine Police Department. For several years Ms. Kierstead published a law enforcement safety handbook, identifying unusual weapons and concealment devices. Ms. Kierstead's work contributed significantly to officer safety and very probably saved lives by making officers aware of new and unique threats they might come up against in the field. Ms. Kierstead has since retired from the Brunswick Police Department, but the last update of her work (2006) can still be found on-line (<http://www.icops.org/PDFs/LawEnforcementSafetyHandbook.pdf>) and is still contributing to officer safety.

The inclusion of a product in this document does not serve as a recommendation for nor as a condemnation of that particular item. Items and resources are listed for information, research, and educational purposes only. All information herein is Unclassified / Open Source.

This document may contain copyrighted material the use of which has not always been specifically authorized by the copyright owner. In accordance with Title 17 U.S.C. Section 107 (<http://www.law.cornell.edu/uscode/text/17/107>), the material herein is distributed without profit to those who have expressed a prior interest in receiving the included information for research and educational purposes. If you wish to use copyrighted material from this document for purposes of your own that go beyond 'fair use', you must obtain permission from the copyright owner.

### Serbu Super-Shorty Shotgun

Reference: <http://www.serbu.com/top/superShorty.php>

The SUPER-SHORTY is based on a Mossberg Maverick (also available on Mossberg 500 or Remington 870 at additional cost) 12-gauge shotgun which came from the factory with a pistol grip. Because of this, the SUPER-SHORTY is considered an AOW (Any Other Weapon) and can be transferred with a \$5 stamp! The gun holds two 2-3/4" or 3" shells in the magazine, plus one in the chamber. The 16.5" overall length, 6.5" barrel and spring-locked foregrip, which pivots out of the way when not in use, make for a very compact package. As far as we know, this is the shortest 12-gauge pump shotgun available. All parts for the SUPER-SHORTY are made in-house on our own CNC machinery using materials ideally suited to the task. All welds are done by the TIG process, and the manganese phosphate finish is MIL-spec. The SUPER-SHORTY is currently being used by various law enforcement agencies and military units worldwide. If you like the idea of concealed carry with a 12-gauge, or like a lot of "bang" in a small package, or just want the most compact breaching weapon available, then this is the gun for you.

Video Review on YouTube: <http://youtu.be/U4FH4cK4T0E>

### Kel-Tec Sub-2000

Reference: <http://www.keltecweapons.com/our-guns/rifles/sub-2000/>

The SUB-2000 is a self-loading carbine for pistol cartridges. Different versions of the SUB-2000 will accept most modern handgun magazines; see below for a complete list. The SUB-2000 has a greatly enhanced accuracy and extended range compared to a handgun. The superior precision is also very useful against small or partially covered targets at shorter range. The amount of training to master the SUB-2000 is only a fraction of that required for a handgun. The SUB RIFLE-2000 has been developed from our highly successful SUB-9 rifle. Although retaining some features of the old rifle, the SUB-2000 is a completely new design. Emphasis has been put on consumer safety, but without impeding the performance. Polymers are used to a large extent, resulting in increased durability and reduced price. The SUB-2000 is available in 9 mm Luger or .40 S&W calibers.

### FN Five-Seven Pistol

The FN Five-seveN® single-action autoloading pistol fires the low-recoil 5.7x28mm cartridge making it ideal for personal protection, target shooting or NRA Tactical Police Competition. It features a textured, ergonomic polymer frame with checkered panels for enhanced grip. The polymer slide cover helps reduce weight and the operating controls allow for easy access with a reversible magazine release and ambidextrous manual safety levers. The barrel is hammer-forged and chrome-lined for enhanced accuracy and extended service life. Models are available with matte black, olive drab green or Flat Dark Earth frames with a choice of adjustable target sights or fixed three-dot combat sights.

#### [The 5.7x28mm "Cop Killer" Cartridge Myth](#)

#### [FN Herstal Five-seveN Pistol](#)

Although it's best known for firing armor-piercing rounds, FN's exotic handgun is also extremely accurate and fun to shoot.

### Glock to Carbine (PDW) Conversion Kit with Folding Stock

Convert pistols to compact PDW weapons.

Increases effectiveness of pistols in a concealable package smaller than a Micro Uzi.

Mounts to front and back of pistol frame.

Includes charging handle, single-point bungee sling, folding stock with rubber buttpad, and top, bottom, and side rails.

Drop-in installation.

Allows use of original iron sights.

Designed for use with or without suppressor. Works with ported pistols.

Rugged aluminum and steel construction.

Perfect for discrete security operatives.

Compatible with Glock 17, 17L, 19, 22, 23, 24, 25, 31, 32, 34, 35

Disclaimer : If you own a host pistol and buy this product, your pistol will become a short-barreled rifle. You must first register your pistol with the BATF.

## Spotting a hidden handgun

### ASYMMETRICAL GAIT

A gun in a right-hand pocket or tucked into the right side of a waistband may hinder leg movement on that side, making the right stride shorter than the left.

A slightly clipped arm swing may also signal a hidden gun: the forearm on the gun side will tend to stay close to the body, instinctively guarding the weapon.

### UPPER BODY SHIFT

When approached from the front, a person with a hidden gun will instinctively turn the gun side of his body away from the person approaching, and may veer to that side to avoid a face-to-face encounter. He is also likely to pull his arm in toward his body on the gun side.

### A QUICK ADJUSTMENT

A gun's weight is distributed unevenly, with more of its weight in the grip than in the barrel. Vertical motion — like descending stairs or stepping onto a curb — tends to shift the barrel upward. A quick, circular movement of the hand or forearm adjusts the gun's position.

### RUNNING FROM THE RAIN

When running toward shelter from rain, or across a busy street, a person concealing a gun is likely to brace the weapon with an arm or hand.

### CONSPICUOUS CLOTHING

Garments worn to conceal weapons often appear odd, mismatched, or out of season, and can actually draw attention to a person trying to avoid scrutiny. A closer look may reveal movements or other characteristic signs of a hidden handgun.

**JACKET FITS UNEVENLY**  
One side hangs lower than the other, and swings like a pendulum with each step

**HAND RESTS ON GUN**  
Hand constantly feels for gun through clothing

**HOLSTER BULGES**  
A holstered gun appears as a lump when arms are extended or when the body bends at the waist

**STYLES DON'T MATCH**  
Oversized or mismatched coat seems incompatible with other clothing

**CLOTHES DON'T SUIT WEATHER**  
A coat is open in cold weather, for quick access to a gun ...  
... or closed in hot weather, to conceal one

## Bump Fire

Bump firing is the act of using the recoil of a firearm to fire multiple shots in rapid succession. This process involves holding the foregrip with the non-trigger hand, releasing the grip on the firing hand (leaving the trigger finger in its normal position in front of the trigger), pushing the rifle forward in order to apply pressure on the trigger finger from the trigger, and keeping the trigger finger stationary. The firearm will recoil and then return to its previous position after the round has been fired first resetting and then pressing forward against the trigger thereby firing successive shots.

The relatively-rapid bursts from semi-automatic firearms crudely simulate the discharge of automatic firearms. Even though a large number of rounds are fired in rapid succession, the trigger finger initiates each discharge; therefore, fully automatic fire is not actually taking place.

### **Umbrella Sword**

Combination sword and umbrella... The sharp 10" long, surgical stainless steel blade has a tapered point specifically designed for deep penetration. The blade is spring tempered to flex up to 30° and never break or take a set. Weighing only 18 oz, this umbrella telescopes to 18-1/4" overall. You can draw the sword with the umbrella open or closed. The double nylon fabric creates a 36" wide dome. Stores easily in your briefcase, glove compartment or trench coat pocket. Comes with nylon storage sleeve. Instructions included. Patented, made by Windlass Steelcrafts®.
