CIA Discredit: The Targeting of the Robles Family

The use of narcotics to discredit and destroy the Robles family

Book Overview

20 Years in Exile, Snowed-In: The CIA Subversion of Russia

Due to the complete and total deafness of those in power and those able to do anything we are forced to take extreme and monumental efforts simply to make the truth heard and to hopefully somehow obtain a little bit of justice. This plea or report involves the very life of an innocent young man so we ask you to please read it to the end. We have been forced to do this all of this simply because those who are supposed to be serving the people and protecting the innocent are more concerned with lining their pockets and guaranteeing their own continued wealth and prosperity while not caring at all where their lucre comes from or what happens to the honest people who are being run into the ground.

Коррупция, это болезнь, убивающая сердце государства, его народ! Коррупция отнимает надежду на справедливость и светлое будущее. Не будь рабом коррупции!

Corruption is a disease, killing the heart of the state and its people! Corruption rips away hope for justice and a bright future. Don’t be a slave to corruption.

We are literally risking our lives by telling you what we are about to partake to you. Lives have already been destroyed to make sure we never spoke out and operations to discredit us have been going on for years to make sure if we do
speak out no one believes us. The people behind what you are about to read are merciless and will stop at nothing to protect their own dirty and criminal schemes and interests. The only thing that would save us would be assistance from the highest level but that is unlikely as Putin is impossible to reach so our only hope is for a large resonance and public support. I still believe in the goodness of the people and the power of the people to bring about change but that belief is also taking a beating.

I have been fighting a CIA sponsored and controlled 5th column in Russia for over 20 years. I have cooperated closely with the Russian Government in this regard although details of that remain confidential. I have paid a price but now my son is paying the price and this is an unacceptable injustice. I am a Russian patriot and believe Russia and President Putin will prevail. Unfortunately the CIA has forced me into hiding and I am penniless and asking for your support to save my son. You are my last hope.

Part of what you are about to read is an excerpt from the book that we are in the process of finishing and that has been over 25 years in the making. Unfortunately due to what has transpired we are being forced to write this under the greatest of stress and duress and after being forced to go into hiding, living under a constant state of terror.

Before people decide to make suggestions as to going to the Security Services or the police or the Investigative Committee, I just want to make it clear we have already done that multiple times. These are organized criminal groups operating under the color of authority which have grown so organized and reached such high levels in the power structure that they are almost invincible. They can arrest and destroy and kill almost at will, especially people in our delicate position.

Overview

Since the late 1980s the CIA has been buying politicians, planting moles, taking over police and internal ministry departments and recruiting and placing their people in the top positions of every large financial organization and important government body in the Russian Federation. With unlimited funds to subvert Russia they have been extremely successful and with the legal mechanisms
they have planted in the Constitution and in Russian law they have been effective in obfuscating and covering up their operations and plans and bring about any result they desire which serves the United States. Along with the carefully thought out designs for privatization after the collapse of the Soviet Union they have placed their own people in power, made them rich and turned the Russian people almost into slaves and beggars who are powerless to speak out or even defend their rights against those with money and connections to the secretly CIA backed power elite.

Russians who are old enough to remember know that what we are seeing today is strangely reminiscent of the 1990s and that is quite simple to explain. All of the agents and moles that were planted in the 90s are now in positions of power and organizing once again the destruction of Russia in exchange for the dollars they receive from the West. The plans of the CIA are never that original and what we are seeing is the same technology used to destroy Ukraine and scores of other countries.

As we already know the CIA offered over 400 million dollars to those who could bring about a military coup in Russia and unfortunately there are those living off US grants and with CIA backing who would jump at that sum and then escape to live on an island somewhere as Russia slipped into anarchy and then total collapse and destruction. Those corrupt treacherous individuals are an internal danger and the biggest danger to Russia and the Russian people.
To hide its plans, its networks and its agents operating in the Russian Federation and in the world, the CIA which has an almost unlimited budget and unlimited resources, will stop at nothing. Any opponent or potential adversary must be neutralized, any threat must be liquidated, anything which threatens its plans must be stopped in its tracks. This “invisible secret war” has become so widespread and obvious to those who are paying attention and know the signs have to wonder why more people are not speaking out.

The main reason you do not hear more is that in its drive for Full Spectrum Dominance the worldwide media and in particular the Russian media, have been completely taken over by the Central Intelligence Agency, the NSA, the 5EYE Intelligence Alliance and all of the corporations and monied interests. Russians are being manipulated, bought, indebted and enslaved to loyally tow their line and in order to protect their own economic interests to do so by default.

Almost every sphere of life in Russia has been affected by the CIA and is in fact controlled or has been undermined by the CIA though its scores of organizations and NGOs and corrupted officials. Even the children of Russia were not spared from the manipulations of the CIA, USAID and the Office of Strategic planning, with multiple CIA programs and manipulations unearthed in the educational sector since the 80s. Currently there are over one thousand CIA Case Officers in Moscow alone all running their own networks of agents, companies and operations. President Putin has so far managed to neutralize the biggest threats and there have been efforts to stop the influence of NGOs and other organizations but it has proven almost impossible to cut out the cancer without killing the patient.
The destruction of the Soviet Union left nothing in its place for the people, just property and wealth to be divided and privatized between those in positions of power who helped bring about the destruction of the USSR, the greatest global power in world history. The Russian people were never once considered in the equation and their pain and suffering are now just laughed off or dismissed. There will never be justice in Russia until the people put their foot down and the corrupt officials are made to respect them and serve them as is their duty and responsibility.

Corruption is such an accepted part of Russian culture that most of the people who enter government do so not to serve the people or advance the state but to jump on the bribe-gravy-train and secure all of the things that most people work all of their lives for. The worst of these are the bandits in the police and security services, many of who literally kill and destroy people, simply to obtain cars and flats and all of the luxurious accouterments they believe they are entitled to.
Lubertsy and Malahovka

Some of the worst criminal gangs entrenched in the police services and being manipulated and used for cover by the CIA have their roots in the bandit filled mafia capital of Lubertsy and came to power in the 1980s and 1990s. Lubertsy’s organized criminal groups include a large percentage of representatives from Odessa and Ukraine, the Caucuses and other areas of the former Soviet Union. It is a fact the “Russian” mafia infamous in the United States is actually a mafia grouping from Odessa in Ukraine.

The Lubertsy groupings largest money makers are in the construction business and narcotics as well as huge incomes from bribes extracted from the population and in particular from businesses for providing documents, licenses, vehicle registration, and other services that should be free or where the funds should go to the state. The income from bribes for assisting in tax avoidance is also monumental and directly steals from the state and the people.

Since the 1990s many of the mafia groups, we say many because each of the 3 major crime groups or “families” is subdivided into smaller groups which in fact are simply “divisions” of the main family groupings. Ex Moscow Mayor Luzhkov, the Baturin family and their new beneficiaries are at the top of one of the groups and control Moscow itself, the seconds is less centralized and more hidden but includes political figures, “business men” with ties to the Security Services and police and others from the Moscow Region as well as simple bandits or “Thieves Under the Law” as they are called in Russia who have secured themselves reputable businesses and positions.

Recent arrests and shake-ups in the latter have included that of Alexei Kuznetsov and members of the Mitrofanov family and grouping which controlled much of the traffic police and related organs. The last of the three major groupings is the Jewish mafia, which was kept out of Lubertsy and which is really Russia-wide with almost every mayor of every city in Russia being Jewish. They control the media, the financial sector and much of the legislative and governmental section.
The institutionalized nature of the corruption is best described by the road bribe scheme which no matter how many reforms take place continues today. According to people on the inside several years ago, all of the bribes collected in the Moscow Region are gathered at the end of the day and they go up the ladder to one Mitrofanov who then divides up the kitty and sends it back down for distribution.

Pravo Poryadok

Another good example is the private “security” company “Pravo Poryadok” (Law and Order) run by and set up by ex-Security Services Generals and employees and bandits from the 90s who ran protection rackets involving businesses and “fixed things” for anyone with the right connections and for a percentage of course.

On their website the Group brags that no police actions or “preventive” operations take place in the Moscow Region without Pravo Poryadok being involved and of providing free assistance to the police in the form of equipment and personnel. In fact being a private army supporting those with power and the police while insuring the “proper” interests are not touched.

Being founded by bandits from the 90s who killed hundreds of people, beat anyone in their way with baseball bats, burned down homes to obtain territory and ran protection rackets draining money from anyone who wished to do business in the region, to have such a close relationship, if not controlling a one, with the police is a question that needs serious discussion. Perhaps in the 90s such groups may have been needed like the Robin Hoods of yore, because they were sometimes the last place for honest people to go to seek help from other groups of bandits but today they simple exist to serve their own interests and those of big money players including the CIA.

All of this is gone over in much greater detail in our book which includes names, dates, companies, officials, bodies and much more.

Pravo Poryadok is important because knowingly or perhaps unknowingly “wink-wink”, they have assisted the CIA in the establishment of a network of
agents and mechanisms that is so deeply entrenched it would be almost impossible to extract today. All of this was organized and set up for a large part thanks to USAID, which during its height in Moscow, Lubertsy and the Moscow region, had funds, people and interests in every type of organization and body possible on almost every block.

Pravo Poryadok is also important because due to the ties it has with not only the Security Services but law enforcement and judicial bodies it is able to hide, obfuscate and cover up almost any crime of any type in the Moscow Region. With the level of wealth in the little town of Malahovka, where multi-billion ruble mansions hide behind massive security fences and Ferraris and S-Class Mercedes cars can be frequently seen, Pravo Poryadok serves the “security” interests of a very carefully hidden elite. An elite who hide their wealth and do not merit the status of being part of the Rublovsky circle of billionaires. The area is also the home of many ex-foreign service employees with close ties to Russian embassies and companies abroad and which help in money laundering and the huge escape of capital from Russia that has existed since the collapse of the Soviet Union.

To further underline the power that Pravo Poryadok has one has to consider that they took over the local police station near the mayor’s building for their
“offices” and built a four story complex next door where “connected” businesses can rent office space. This location is also a place where one can purchase a Russian passport for the sum of about $50,000 US a fact we will return to later as it is key here.

The Werewolves with Epaulettes

Finally another gang in question was called Werewolves in Uniform or Epaulettes but has since become more sinister and organized after attempts by the Federal Security Service and the Russian Investigative Committee to shut it down. The group was almost completely disbanded but the prosecutors and people in the judicial and investigative bodies as well as people in the FSB, who had been covering and operating with the group remained in their positions and gained power. These figures have facilitated the return of the group which is now more insidious, advanced and more deadly than before.

This groups’ main source of “income”, along with all of the investigators, judges, lawyers and prison personnel who profit in the scheme comes from the
fabrication of serious narcotics related offenses. Not long ago before the FSB cracked down and arrested the majority of the group they had grown so bold that uniformed police who were part of the group were openly driving stolen BMWs without even bothering to hide the fact or attempt to “legalize” the cars.

The scheme is simple, once a target is determined (usually by the type of car the person drives and with this they are helped because they have access to all officials automobile records) a seemingly routine traffic stop is conducted or a knock on the door visit during which a quantity of narcotics is planted in the vehicle or on the person. Once the arrest is made a bribe of around 9 million rubles is demanded to make the whole thing go away. In our case when it was clear we could not pay so it then went down to 4 and then to 2.

The local people in Zhulebino and Lubertsy and even members of the Security Services and the upper departments of the police and internal ministry know about the group but the way the cases are fabricated, with excruciating attention to detail and how targets are selected, usually from more marginalized or vulnerable members of the populace who are then terrorized into silence or whose families are then threatened and blackmailed into silence as in our case, they continue to get away with whatever they like. In this way they obtain not only millions of rubles but flats, cars and anything else of “value”.

Like a government within a government the mafia in Russia has departments and directorates and a completely logical structure like a corporation. Being what one might call “the sharp end of the mafia’s stick” the Werewolves in Epaulettes is of special interest to the Central Intelligence Agency who use its services when certain dirty “jobs” have to be done. It was these animals that came after the Robles family when other attempts failed.

**The Case of the John Robles Family**

Since the 1990s, until recently, John lived in this “wonderful” Moscow Region town of Lubertsy. It is also the home to a huge network of CIA Agents consisting of paid officials, police department heads and assorted corrupt security service personnel and ex-personnel, generals and bandits of every
type. It is also a place where the amount of people such as the mayor Vladimir Petrovich Ruzhitsky who send their children to the US for studies and vacations, and who themselves love the US as a vacation destination, might cause one to question a conflict of interests when it comes to being responsible for the safety of people with political asylum from the US. Unfortunately for John due to his status and targeting by the US Government and the fact that he had ties with the Russian Government, he and his family were located in what was a closed military area in Lubertsy called Gorodok B or “City B”.

We ask you just think for a minute, with an official budget for 2015 of over 66.8 billion dollars (and this does not include sums such as the $52 billion spent on Project Euro-Maidan in Ukraine and the 100s of billion in black funds obtained by the agencies) and a total workforce of over 1,550,000 worldwide according to information we have obtained (not including the over 854,000 US Citizens holding Top Secret security clearances) and a mandate (if in fact not a mission) to break the laws of every country in the world, how are we then to believe that the CIA is somehow transparent and law-abiding and looking out for the interests of US citizens as they have claimed. Today the CIA and the NSA are agencies that have grown so large and all-encompassing that they are out of control and unaccountable to anyone, least of which being the American taxpayer.

**Direct Message from John Senior**

The problem with being a target of the Central Intelligence Agency (DCI/CIA) and a target of the US Government for over 20 years is that for normal people this is not something that they can deal with or relate to. The media does its job as well by calling anyone who speaks out on such matters a conspiracy theorist, paranoid or even crazy and the just the simple fact alone makes someone somehow immediately guilty of something.

I was targeted by the US Government in the US and then the CIA picked up the crosshairs when I was in Cuba. Since my arrival in the Russian Federation I have been repeatedly targeted over the years and now CIA assets have chosen to target my children. I have detailed absolutely everything, including dates,
names, locations, companies, photos, documents and more in a 750+ page book that will soon be released.

**Claimed CIA Organized or Ordered Attacks in Brief**

The first attack came in 1997 when I was robbed at gun point while being escorted by my first Russian wife Marina from Malahovka.

The second was by two Ukrainians who got my briefcase and passport and pay. My US passport was promptly replaced by the US Embassy. This was in 1998.

In 1998 I also opened my first site with the initial offering was the now infamous MI-6 list and the CIA’s 1998 budget.

Life proceeded rather quietly until 2001 when I became more active on the Internet attempting to expose 9-11 and the NECON coup.

Until the revocation of my passport in 2007 on false grounds nothing extraordinary really occurred, I worked and raised my children and was more or less untouched. The goal of the US Government in the revocation of my passport was my immediate return to the United States. They believed that without my passport I would soon be in their hands. At the time Nancy Pelosi offered to assist me in obtaining a passport if I sent my children to the US as collateral. The CIA decided to attack my strong points on all fronts after this and proceeded to organize dozens of attempts to discredit me and my family.

The third attack and robbery was in 2007 by yet another Ukrainian looking guy with a Kazakhstan passport who stole about 5,000 dollars from me.

What I will call the fourth was a series of attempts to break into the flat I was living in.

It was clear in 2008 that someone was trying extremely hard to finish me off and end my life in Russia.

The fifth “attack” was on my family now. It was the first attempt to discredit my family and I with the appearance of one Sergey Chursakov who accompanied my daughter to her first job interview stinking of Vodka and then scattered Syringes around my school in Malahovka which was located at Pravo
Poryadok. This person introduced illegal narcotics into the picture and attempted to involve my children in narcotics. As you can see by my son’s situation he did well. According to the information I have the 2 tablets of ecstasy that this Lebedev had were in fact provided by Chursakov.

The sixth “operation” came with the appearance of one Yura Salogub, whom the daughter of the director of the school where I worked had met in New Jersey after she had found out I had asylum. He is a Ukrainian who admitted to buying a Russian Passport through Pravo Poryadok after arriving with his wife, organizing a fictitious marriage to a Russian citizen and then within days receiving a Russian Passport. How much he paid exactly he did not tell me but I was told for 50,000 I could do the same thing.

This Ukrainian then proceeded to take my school away and attempt to spread rumors among my students and supporters in Malahovka where I had worked for 13 years. He even actively threatened my lawyer and engaged in several high speed chases of me when I took them to court to attempt to get my school back from him.

That story ended with them owing me several hundred thousand rubles but the courts have never enforced the order from the court for restitution. I also ended my relationship with Pravo Poryadok and the Security Service person who I had contact with before.

Unfortunately for the US Embassy and the CIA network in the Lubertsy mafia I found another job. This time at the Voice of Russia World Service in English, needless to say they were not pleased. Not only was the Embassy not pleased but these mafia hoods and heads whose children I had been teaching for years were also extremely upset. Namely by the fact that I was obviously on my way up and moving into a circle where they could not get me and where if I spoke out I would be listened to. Here it is important to recall that several times CIA officers overseas have told me they would “get me” as did the corrupt officials in Woodland California where all of this started!

After I started working at the Voice of Russia I was also working at English First in Zhulebina. This is where Natalia Surikova found me. She walked in one day
and said she had heard about me and ONLY wanted to study with me. At the
time I did not realize what this meant.

From 2009 to the present the CIA and their assets have been relentless and
have lost any semblance of fear or hiding their intentions or activities but they
have failed and in my book I will tell you why. Until now when they have had
my son sent to prison.

Operation 7, the Surikovs and Dotsenkos continues to this day. First she got
close to me, then even arranged a marriage and wedding to me that she never
showed up to. I was supposed to kill myself I later found out. Over the years
she manipulated me and constantly attempted to make my son leave.

Operation 8 and 9 were the most serious and open attempts by the US
Government to get me expelled from Russia and took place after I already had
asylum and involved ex-US Ambassador to the Russian Federation Michael
McFaul. On two occasions he filed complaints that I had threatened him after I
exposed his plans to organize a Color Revolution in the Russian Federation.
After the first attempt failed to have me imprisoned and deported by saying I
threatened him he filed an official diplomatic complaint saying I physically
threatened him.
My journalistic work continued and I was gaining popularity and exposing US illegality worldwide. My efforts to expose 5th column manipulations and the subversion of the Russian State by the US/NATO/CIA continued as well as my Internet activism. There were many at the Voice of Russia who were against my fight for the truth and had long ago been agents of the State Department and there were multiple attempts to get me taken off the air and site and ruin my reputation.

Soon after McFaul failed I was called in one day to a meeting where in the presence of baseball bats I was made to give up the password and logins of my private e-mail accounts. This I reported to police and nothing happened.

I continued my work and my family and I were about to get Russian citizenship when first Snowden arrived and then my son was the subject of an entrapment operation where police planted drugs on his person. We obtained CCTV footage but no one was ever prosecuted as far as we know. Our applications for citizenship were frozen.
After Snowden arrived, who I am convinced is a CIA Psychological Disinformation Operation due to inside information I have which I detail in my book, many strange things started to happen. Including concerted efforts by certain people on the Internet team at VOR to delete and erase likes and comments from my work, the deletion of articles and other things which I documented and the continued elimination of anything pro-Russian at the VOR.

The next attack was an attempt to paint me as if I have something against the Russian Orthodox Church because of my work against USAID. The article has been declared extremist in Russia now, a small victory.
After Ukraine started due to my journalistic work I was placed on the Right Sector list and an SBU hit list and I was informed by WikiLeaks that I was on a WikiLeaks watch list after working closely with them for years.

The final humiliation at the VOR was when after the liquidation I was forced to work for a month at Rossiya Sevodnya while undergoing reconstructive dental surgery which took a month. I was forced to read the news every night with no upper teeth. Then after informing them of the birth of my daughter who it appears may not even be my daughter (see the book) I was terminated. I filed suit but of course no result. This was state media.
Given that the Chairman of the VOR was apparently friends with McFaul all of this seems obvious as to who was behind it. I have not found a normal job since. Although I did work for a short time as the Alibra school in Moscow until Alpha Bank and the head of PR attempted to have my wages frozen after multiple attempts to get me to send the US Government detailed forms as to my income and residence etc.

I have continued my journalistic work and fighting the US/CIA/NATO 5th column and have appeared on Russian television and even renounced my
citizenship to the US multiple times in public, once in front of tens of thousands last year in Crimea, but I receive no support and even though I have asylum there is no support, no benefits and I am preparing to just die with no hope for ever simply normalizing my status and being able to simply live a quiet life. I must add that the people at the VOR simply used me, sometimes to write things that were simply treasonous and literally placed my life in danger but I naively believed my family and I would be protected. We have political asylum and thus are refugees but even under Russia’s international obligations there has been no support. This is all in my book including the last statement by the Director of the Federal Migration Service in Lubertsy when I made an appointment to beg him for help. He offered me a rope to hang myself.
Finally the Surikov and Dotsenko attacks. This family, while claiming the father is a General in one of the Special Services which has never heard of him, has gotten me evicted, contacted possible employers with lies and false information and contributed to my son’s arrest. They also have a dacha in Malohovka and I am sure if thus ties with Pravo Poryadok.

I have not been allowed to see my apparent daughter with Natalia for over a year and I say apparent because the child is whiter than either me or the mother and as the mother was not living with me when she was my wife and in fact never lived with me and her pregnancy according to my count lasted 14 months I believe she only needed the words “Father US Citizen” on the child’s Birth Certificate who is now the heir to the family’s mansion, 2 cottages and multiple apartments in Moscow, Zhulebino and Lubertsy.

Which leads us to the reason I am writing this: the arrest of my son which I believe was just a continuation of the attacks on my family and I by the Lubertsy mafia and the CIA’s agents in the government bodies in Lubertsy and in particular in the FMS of the Moscow region.
Contrary to European and internationally accepted standards and in violation of his rights as a US citizen and a person with political asylum my son was targeted in an entrapment operation and simply used in order to free a known drug addict and police informant who had already done the same thing six times.

Corrupt police then demanded first 9 million, then 4, then 2 million, rubles to make the whole thing "disappear". The trial took place with no defense witnesses, no proper counsel and the father has not been allowed to see him once for almost a year. His health is deteriorating, he has lost weight and is subject to beatings and constant humiliation because of his race, national origin and political status. He is never given enough to eat, is kept in overcrowded conditions and there are constant demands for money from the father, namely so he can eat "normally".
The prosecution claimed John sold 2 tablets of ecstasy, which were already in the possession of the addict. There was no recording made and the defense and John were not allowed to see the evidence against him because the prosecution said it was "secret". We maintain it was because it does not exist.

Even were it true for a first offense and for the minor quantity the 5 year sentence was extreme. We demand a proper investigation take place and that John be freed immediately.
The "police" in the area are already known to have run such schemes for years. They plant drugs, then demand huge bribes, take cars, flats or whatever they want from the victims. Many of the people in Lubertsy and Zhulebino where this occurred have lived in terror of these police for years but there is nothing done to stop them. They are even known by the name "Werewolves in Uniform"
The longer he is kept in such conditions and I can not find the huge sums of money being demanded I am certain my son will probably die. He continues to be kept isolated and incommunicado. We were just informed that after his appeal failed he will be transported to a prison colony yet no one knows exactly to where and they say it may take 6 months. During which he will have no communication whatsoever and no one will know where he is.

Again we are afraid he may be killed and that the entire persecution was an attempt to secure a 9 million ruble bribe and silence the father who has been undergoing a political persecution of his own. They do not want the world or anyone for that matter to know the real story or for John or the family to make any noise. The father was being threatened both physically and through communications channels to be silent or he will lose his asylum. The father was also beaten, his landlady threatened until she evicted him and could not find employment. The father was also threatened with the fabrication of a criminal case and had to flee from the area where he lived quietly for almost 20 years in fear for his life.
Given the fact that the family has had political asylum since 2007, are not allowed to obtain citizenship, have been the subjects of arbitrary persecution, are literally being destroyed for political reasons, are citizens of the United States and are people with official and internationally recognized political asylum who should enjoy the protection not only of the Russian Federation but the United Nations, we demand that John be freed immediately.

Again the younger John Robles has never been politically active, he was just a young person about to get married and working in a company making applications for Android and other phones and his persecution was a way to get the father, secure silence or obtain a bribe.
